

Ubuntu Innovations (Pty) Ltd

Software Inventory and Licensing Plan Week 1 – Task 3 | IT Support Capstone Project

Document Overview

This software inventory documents all recommended software solutions for Ubuntu Innovations (Pty) Ltd, a 25-employee technology startup relocating to a new office in Cape Town. Software is organised by category: company-wide tools used across all departments, and department-specific applications. Licensing types, cost models, and deployment notes are included for each entry.

1. Company-Wide Software

The following software is required across all 25 users regardless of department.

Software	Purpose	License Type	Cost Model	Deployment
Ubuntu 22.04 LTS	Desktop OS	Open Source (GPL)	Free	All desktops & laptops
LibreOffice 7.x	Word processing, spreadsheets, presentations	Open Source (MPL)	Free	All workstations
Google Workspace (Business Starter)	Email, Calendar, Drive, Docs, Meet	SaaS – Per user	~\$6/user/month = ~\$150/month	Web & desktop app

3. Server and IT Infrastructure Software

Software deployed on the company server/NAS to support network services.

Software	Purpose	License	Notes
Ubuntu Server 22.04 LTS	NAS / file server OS	Open Source	Free; LTS until 2027
Samba	Windows-compatible file sharing (SMB/CIFS)	Open Source (GPL)	Free
OpenLDAP	Centralised user directory services	Open Source	Free
Netdata / Zabbix	Network & server monitoring	Open Source	Free
Rsync + cron	Automated backup scripting	Open Source	Free
Veeam Agent for Linux (Free)	Backup and recovery	Freeware	Free for 1 server

Software	Purpose	License	Notes
Pi-hole (optional)	Network-level ad & malware domain blocking	Open Source	Free; runs on VM
Bind9 / dnsmasq	Internal DNS resolution	Open Source	Free
ISC DHCP Server	Dynamic IP assignment	Open Source	Free

4. Software Update Procedures

Update Type	Frequency	Method	Responsible
OS & package updates (Ubuntu)	Weekly (automated) + manual monthly review	apt update & apt upgrade or unattended-upgrades	IT Administrator
Antivirus definitions	Daily (automated)	ClamAV freshclam daemon; Malwarebytes auto-update	IT Administrator
SaaS applications	Automatic (vendor-managed)	Browser / app auto-update	Vendors / IT to monitor
Open-source desktop apps	Monthly patch cycle	apt or Snap package manager	IT Administrator
Security patches (critical)	Within 48 hours of release	Emergency apt patch + restart where required	IT Administrator

5. Estimated Monthly Software Licensing Cost Summary

Category	Solution	Est. Monthly Cost (USD)
Productivity Suite	Google Workspace Business Starter (25 users)	\$150
Password Manager	Bitwarden Teams (25 users)	\$75
Antivirus (Endpoint)	Malwarebytes Teams (25 users)	\$100
Electronic Signing	DocuSign / Xodo (3 exec users)	\$45
Accounting	Sage Business Cloud (4 finance users)	~\$60
Payroll	SimplePay / PaySpace	~\$25
HR Management	Zoho People (3 HR users)	~\$4
CRM	HubSpot CRM Free	\$0
Marketing	Canva Pro (team)	\$13
Developer Tools	GitHub Free / Jira Free	\$0
Open Source Tools	All other software listed	\$0
ESTIMATED TOTAL / MONTH		~\$472 USD

* Costs are approximate USD estimates as of 2025. South African Rand equivalent will vary with exchange rates. Open-source software constitutes the majority of the stack, significantly reducing licensing expenditure.
