

Ubuntu Innovations (Pty) Ltd

Week 2 – Task 4: Software Deployment Plan

IT Support Capstone Project

1. Introduction

This Software Deployment Plan outlines the standard software environment, deployment procedures, licensing requirements, and update management strategy for Ubuntu Innovations (Pty) Ltd. The document ensures that all employees across departments have access to secure, reliable, and properly licensed software required to perform their daily operational tasks.

Ubuntu Innovations is a growing technology startup based in Cape Town with 25 employees distributed across Executive Management, Finance, Human Resources, Sales and Marketing, and Software Development departments.

2. Objectives of the Software Deployment Plan

- Standardize software installations across the organization.
- Ensure all software is legally licensed and compliant.
- Improve employee productivity through appropriate tools.
- Reduce cybersecurity risks through regular updates.
- Simplify IT support and troubleshooting.
- Support future company growth and scalability.

3. Standard Software Packages

Software Category	Recommended Software	Purpose
Operating System	Ubuntu Linux 24.04 / Windows 11 Pro	Main operating system
Web Browser	Google Chrome / Mozilla Firefox	Internet access
Office Productivity	Microsoft 365	Documents and spreadsheets
PDF Reader	Adobe Acrobat Reader	Viewing PDF documents
Antivirus	Microsoft Defender / Sophos Endpoint	Endpoint security
Communication	Microsoft Teams / Zoom	Collaboration

4. Department-Specific Software

❖ Executive Management

- Software: Power BI, Teams, Zoom, Adobe Acrobat Pro
- Justification: Business analytics, executive communication, and document approvals.

❖ Finance Department

- Software: Sage Accounting, Payroll Software, Microsoft Excel
- Justification: Financial management, payroll processing, and budgeting.

❖ Human Resources

- Software: HR Management System, Microsoft Word, Teams
- Justification: Employee records, leave management, and communication.

❖ Sales and Marketing

- Software: Canva Pro, CRM Software, PowerPoint, Social Media Tools
- Justification: Marketing campaigns, customer engagement, and sales presentations.

❖ Software Development

- Software: VS Code, GitHub Desktop, Docker, Python, Node.js
- Justification: Application development, testing, and deployment.

5. Software Deployment Procedures

❖ Step 1: Device Preparation

- Verify hardware specifications, install operating systems, configure network connectivity, and apply updates.

❖ Step 2: User Account Creation

- Create employee accounts, assign security groups, and configure passwords and permissions.

❖ Step 3: Software Installation

- Install standard software packages, department-specific applications, and security tools.

❖ Step 4: Security Configuration

- Enable firewalls, antivirus protection, disk encryption, and automatic updates.

❖ Step 5: Testing and Verification

- Verify software launches correctly, printers function properly, and internet connectivity works.

6. Update and Patch Management Procedures

Update Type	Frequency
Security Updates	Daily automatic updates
Feature Updates	Monthly
Antivirus Updates	Daily
Major OS Upgrades	Annually

7. Licensing Requirements

Ubuntu Innovations will maintain software licensing compliance by using volume licensing, subscriptions, and approved open-source software. Employees are prohibited from installing unauthorized software or using pirated applications.

8. Security Considerations

- Only approved applications may be installed.
- Administrative privileges will be restricted.
- Endpoint protection software is mandatory.
- USB access may be restricted.
- Devices must use password protection and encryption.

9. Backup and Recovery Considerations

Deployment configurations, installation packages, user profiles, and license information will be backed up regularly to the NAS backup device and secure cloud storage.

10. Roles and Responsibilities

Role	Responsibility
IT Administrator	Software deployment and maintenance
Department Managers	Approve software requests
Employees	Use software according to company policy
Security Officer	Monitor compliance and risks

11. Benefits of the Deployment Plan

- Improved operational efficiency
- Standardized IT environment
- Reduced software-related issues
- Better cybersecurity protection
- Improved employee productivity

12. Conclusion

This Software Deployment Plan provides Ubuntu Innovations (Pty) Ltd with a structured and professional approach for deploying, managing, updating, and securing software across all departments.

The plan ensures employees have access to the necessary tools while maintaining security, compliance, and operational reliability.
